# CSS COLORS

# CSS

CSS is the language we use to style a Web page. CSS stands for Cascading Style Sheets CSS describes how HTML elements are to be displayed on screen, paper, or in other media CSS saves a lot of work. It can control the layout of multiple web pages all at once External stylesheets are stored in CSS files.

## Three Ways to Insert CSS

**External CSS**

**Internal CSS**

**Inline CSS**

- **External CSS**

  With an external style sheet, you can change the look of an entire website by changing just one file! Each HTML page must include a reference to the external style sheet file inside the element, inside the head section.

- **Internal CSS**

  An internal style sheet may be used if one single HTML page has a unique style. The internal style is defined inside the <.STYLE.> elements, inside the headd Sectionn.

- **Inline CSS**

  An inline style may be used to apply a unique style for a single element. To use inline styles, add the style attribute to the relevant element. The style attribute can contain any CSS property.
